Empowering the energy sector with legal intelligence

Shalabh Gupta , CEO and Co-Founder, Sidhhanth

Legal Complexity in India's Power & Energy Sector

India's power and energy sector operates within a highly complex legal and regulatory environment.

The Legal complexity involve:

- Electricity Act, 2003
- Tariff regulations
- Power Purchase Agreements
- Tender related issues
- Renewable obligations
- Environmental and land laws
- Arbitration and contractual disputes

Decisions are influenced by multiple judicial and regulatory forums, including the Supreme Court, High Courts, tribunals, and regulators. Fragmented legal information slows research, increases risk, and delays critical business decisions.

Key takeaway: Legal intelligence is becoming essential for compliant, resilient, and commercially sound energy operations.

Strategic Value for Power & Energy Stakeholders

There is a need of platform that can help power sector stakeholders turn legal complexity into strategic advantage.

For Utilities and DISCOMs

Defend tariff litigation, track regulatory precedents, and strengthen compliance posture.

For Power Generators and Developers

Support PPA claims, assess change-in-law positions, and manage arbitration and financial risk.

For Regulators and Policy Bodies

Promote policy consistency aligned with judicial and regulatory precedent.

For Law Firms & Advisory Team

Accelerate infrastructure, litigation research and improve case preparation quality.

Strategic impact:

- Reduce legal research time by up to **80%**
- Improve litigation and dispute-readiness
- Strengthen regulatory compliance
- Enable better commercial and investment decisions

Our value proposition: deep expertise

Our History

- Started as a law firm and parallelly an automation firm
- Expanded to sector based intelligent automation, AI and advanced analytics
- Recognized experts in Agentic AI and Saas capabilities

What we Do

- We deliver SaaS solutions for MSME clients
- We support clients derive more value for their business by transforming their approach to CRM, Research, Analytics and AI
- We are a multinational organization with planned offices in UK, USA, Canada, Dubai, Switzerland and India

Why work with Sidhhanth

- Co Founders recognized as Industry experts with patents awarded to their names on AI and workflows
- Easier to work with: faster to engage, faster to deliver
- Ai Focus: Bringing and building capabilities for automation success
- 100% boot strapped till now – no external investor

Our Products (Live)

LawTribe Workspace

Problem :

Current Law research engines are very generic and are not useful in tight timelines

Solution

- Empowering Legal teams with instant access to research, insights, and AI-driven case analysis.
- From research to notary, bare acts – everything at your fingertips, powered by Gen AI.
- This can be applied to any legal teams across industries where contract analysis or research is required

LawTribe Community

Problem :

There is no community for legal professional

Solution

- Empower consumers free access to best legal talent and knowledge
- Empower legal minds through free access to knowledge, peer learning, tech-driven collaboration, and monetizable opportunities

LawTribe - Situation, Challenge and Solution

Situation : current Law tech solutions are not cohesive and are not useful in tight timelines

Challenges for Legal Teams

- Clunky and slow research tools for contract databases
- Notarization processes are ad hoc and unstructured
- Clunky Reference to relevant Judgements
- Reminder Management is a nightmare
- Drafting is old school
- Getting client and managing relationships is a balancing act
- Unstructured Document Management - CRUD
- Painful Case Record Management
- Delayed Reference to Bare Acts
- Difficult to Identify strong Interns

Solution

Overview Summary

The Indian judiciary, particularly the Supreme Court, has consistently emphasized a doctrine of judicial restraint in matters pertaining to tender processes in the power sector, acknowledging the complex technical and commercial nature of such decisions. The core legal principle established is that courts should not act as an appellate forum over the commercial or technical evaluations of expert bodies unless the decision-making process is tainted by illegality, mala fides, unreasonableness, perversity, or arbitrariness. As held in Tamil Nadu Generation and Distribution Corporation Ltd. (TANGEDCO) Rep. by Its Chairman & Managing Director Vs. CSEPDI - Trishe Consortium, Rep. By its Managing Director and reiterated in Montecarlo Ltd. Vs. NTPC Ltd., judicial review is limited, and courts should defer to the tendering authority's interpretation of tender documents and assessment of technical qualifications, especially in complex projects. This principle was also echoed by High Courts in cases like S.C.T. Limited and Another Vs. Punjab State Electricity Board and Others, RTS Power Corporation Ltd. and Another Vs. State of Rajasthan and Another, and Shapoorji Pallonji and Company Ltd. and Mr. Vinay Karve Executive Vice President (Legal) Vs. Maharashtra State Power Generation Co.

S.C.T. LIMITED AND ANOTHER VS. PUNJAB STATE ELECTRICITY BOARD AND OTHERS

Court: Punjab & Haryana High Court **Date:** 20-07-2005 **Citation:** LEC-HC-P&H-2005-392609

Head Note: The High Court held that judicial review of *tender* awards is limited to scrutinizing the decision-making process for illegality, mala fides, unreasonableness, or arbitrariness, and not to re-evaluate commercial decisions of expert bodies. The Board was justified in not awarding the contract to the l...

BMM ISPAT LIMITED VS. STATE OF KARNATAKA

Court: Karnataka High Court **Date:** 17-10-2016 **Citation:** LEC-HC-Kar-2016-1140941

Head Note: The High Court held that the rejection of a *tender* application based on "hyper technical consideration" of documentary non-compliance, particularly when the alleged defects relate to collateral rather than essential conditions, is not justified. The court emphasized that public interest, especially ...

ENERGY WATCHDOG VS. CENTRAL ELECTRICITY REGULATORY COMMISSION

Court: Supreme Court of India **Date:** 11-04-2017 **Citation:** LEC-SC-2017-1164379

Head Note: The Supreme Court held that the Central Electricity Regulatory Commission (CERC) retains regulatory power under Section 79(1)(b) of the Electricity Act, 2003, even when tariffs are adopted through competitive bidding under Section 63. It clarified that 'composite scheme' under Section 79(1)(b) refer...

The Same AI Foundation Can Power Utilities

From Legal Intelligence to Utility Intelligence

- The same AI foundation built for legal can be adapted for power and utilities
- Knowledge-heavy workflows, time-critical decisions, and fragmented systems exist in both sectors
- Siddhanth combines AI, workflow intelligence, and domain context into one practical model
- Our approach is industry-adaptable, scalable, and designed for operational impact

Where Siddhanth Can Create Utility Value

- Asset maintenance intelligence and technician support
- Inspection, audit, and compliance documentation assistance
- Knowledge retrieval across engineering, operations, and service teams
- Planning and analytics support for more informed operational decisions
- Outage response and incident decision support
- AI-assisted work order generation and field service coordination
- Regulatory, safety, and SOP knowledge assistant
- Customer communication and multilingual service support
