India SMART UTILITY Week 2026

10 – 14 March 2026, New Delhi

Session Topic : GENDER BALANCE IN THE ENERGY SECTOR

Presented By

Vishnu S. Srivastava, Head-Strategic Projects, BSES Rajdhani Power Limited

INTRODUCTION

The role of women is very critical to achieving the goals set by our honorable Prime Minister for Viksit Bharat 2047.

Women's active participation across sectors—especially in leadership, innovation, and workforce development—will drive India's transformation into a developed nation.

By empowering women through skill-building, equal opportunities, and inclusive policies, we can accelerate economic growth, technological advancement, and social progress, ensuring a balanced and sustainable path to Viksit Bharat.

Global – India energy workforce at a Glance

Sector	Global Female Share	India Female Share	Key Trend
Healthcare	**~67%**	**~50%**	The most female-dominated sector globally; India shows near-parity in this field.
Energy & Power	**~20% to 32%**	**~11% to 22%**	Higher in renewables (32% global) than traditional oil/gas; India trails global averages.
Infrastructure	**22.40%**	**~13% to 16%**	Traditionally male-dominated; global participation has seen marginal increases recently.
STEM Fields	**28.20%**	**~25% to 28%**	India has high STEM graduation rates for women, but professional translation remains a challenge.

RELEVANCE

India has ranked 131 out of 148 countries in the World Economic Forum's Global Gender Gap Report 2025, slipping two places from its position last year.

Gender Balance Rates- Global V/s India

From 2010 to 2026, the sectoral gender balance for the working class has seen slow, steady progress globally, while India has experienced a dramatic "U-shaped" recovery in female participation over the last decade.

Metric	Global (2010 vs 2026)	India (2010 vs 2026)	Growth Type
Female LFPR	**~51.5% → ~49.0%**	**~25.5% → 35.1%**	India: **+37.6%** growth Global: **-4.8%** (stagnant/slight decline).

Significant Initiative by Odisha Power Transmission Corporation Ltd.

Empowering woman - Odisha SLDC had only female executive at Control Room which include, Complete grid operation, outage management, ERLDC coordination, Real time & Day ahead Scheduling, demand estimation carried out by team.

BSES not only appreciates but also aims to learn from these key initiatives by other power sector companies across India.

BSES at a Glance

BYPL launches first all-women power distribution sub-division

NEW DELHI: In a significant milestone for India's power distribution sector, BSES Yamuna Power Limited (BYPL) has launched its first all-women led Operations and Maintenance (O&M) sub-division office at Saini Enclave in East Delhi.

Named 'Ojhaswini,' symbolising strength, vitality and radiance, the initiative marks a decisive departure from traditional norms by placing women engineers in charge of one of the most field-intensive and operationally demanding segments of electricity distribution. The sub-division was inaugurated in the presence of Amal Sinha, Group CEO, BSES, Brajesh Kumar, Chief Operating Officer, BYPL, senior leadership members, and women representatives from local Resident Welfare Associations.

BYPL officials said the initiative goes beyond symbolic representation and reflects a merit-driven approach to leadership in frontline power operations. They emphasised that leadership capability is defined by competence, preparedness and professional excellence, rather than gender. This is the first women-led power distribution sub-division office in Delhi and among the first such initiatives in India. The Saini Enclave sub-division is a core operational unit responsible for end-to-end last-mile power supply, including field maintenance, outage management, safety oversight and regulatory compliance.

- **Over 1,000 women professionals are part of the BSES workforce, contributing across engineering, operations, digital innovation, customer engagement and leadership roles.**
- **Launched the power sector's first women-led Operations & Maintenance (O&M) unit at BSES, under the brand 'Ojaswini'. Ojaswini demonstrates that operational excellence is driven by capability and opportunity.**
- **Four women technicians have been inducted as linemen in the BSES Ojaswini unit, expanding women's participation in frontline technical roles.**
- **Through collaboration with WePOWER, several BSES women professionals have participated in SAR100 and SAR 2.0 leadership programs to strengthen leadership and professional development.**

Few Glimpses of Women Empowerment

Panel Discussion - Shaping Women Talent in Emerging Energy Landscape

Smiles that Inspire: Together Towards Tomorrow

Celebrating Excellence - Felicitating the WePower SAR 100

Steering the Future: Tour the SCADA Control Center at BSES

Observing the dais, male dignitaries are in the minority—a powerful message urging us to take concrete action for diversity and gender balance across all segments and sectors, lest the status quo persists.
